

Zegowska szama SRS

This document contains all the necessary information to start the development of the initial project. The document concludes:

- Abbreviations
- User story
- Functional specification
- Non-functional specification
- The use of external apis

Abbreviations

- SRS *Software Requirement Specification*
- FS *Functional Specification*
- NFS *Non-Functional Specification*
- SAD *Software Architecture Document*
- UI/UX *User Interface/User experience*
- API *Application Programming Interface*
- CRUD *Create, Read, Update, Delete*
- [...]

User story (translation)

Students, teachers and the team responsible for the school's cafeteria "Zegowska Szama" want to use a modern web app which allows users to browse offers, order products online. The app also allows the team responsible to manage users, discounts, orders and push announcements to the existing users.

Functional specification

- System allows the users to browse available products
- System allows the users to filter products by name, price, availability, discount
- System only allows logged in users to view special offers
- System allows ordering products via a checkout
- System allows the admins to CRUD products
- System allows the admins to manage the roles of users (user, worker, admin)
- System allows the admins to push notifications to the users via the website

Non-functional specification

- The user input must be validated before being submitted
- The database must be secure (password hashing, prepared statements)
- The web page UI must be responsive
- The system must support min. 100 users at once
- The system must be running at least in the school hours (7:10 - 16:00)
- The client side script must be performant (response time < 2000 ms)
- The system must have accessibility features regarding the page colors

The use of external apis

There will be no use of third-party apis
